

NISSAN

VMOTION 2.0

AN EXCITING NEW CONCEPT FOR TOMORROW'S BUSY PROFESSIONALS

Vmotion 2.0 signals Nissan's future sedan design direction and intelligent-mobility technology. It combines a high sense of style, emotional design, space, comfort and technology to make the mobility experience seamless.

Unique carbon finisher with thin silver threads accents the roof line

"Floating roof" flows seamlessly from the steeply raked A-pillars to the trunk lip

Nissan's "V-motion" front design signature evolves, forming a 3D shape

Crisp character lines resonate through the car's body

Extended wheelbase shows off a generous cabin

Distinctive body surface defines Nissan's "Emotional Geometry" design language

Wrap-around rear glass and floating C-pillar provide an impression of intelligent and efficient aerodynamics

Dynamic high-tension body is crafted in a warm silver paint with copper undertones

Signature Boomerang-style taillights emphasize width

Rear diffuser glows when the car operates in ProPILOT mode

With a layered paint finish, a glimpse of the body at different angles reveals a subtle but different hue
