

INFINITI QX50: ADVANCED HUMAN ARTISTRY

The QX50's interior design articulates a sense of advanced human artistry. The cabin's hand-crafted feel is achieved by employing Japanese approaches to the treatment of materials. This creates a tailored appearance and ambience inside the car

Using bespoke manufacturing methods, 'wrap and sew' detailing is a highlight of the hand-crafted ambience. The leather on the dash is selected for its quality and is hand-wrapped over panels

The seats, door panels and dashboard feature a laser hole-cut stitch pattern, tailored to follow the interior's curves. Contrast color stitching on the seats is paired with leather piping

The optional moonroof stretches across the cabin and cargo area, providing a dramatic, panoramic view of the sky for passengers. This visually enhances interior space, flooding the cabin with natural light

The sports-inspired steering wheel is shaped for a comfortable grip over long distances to minimize hand fatigue and allow the driver to feel fully in-control. Wheel-mounted paddle shifters maximize ease of use
