

INFINITI QX50: DESIGNED TO PERFORM

Distinctive proportions and Powerful Elegance design language set the QX50 apart. A sense of human artistry is clear with quality materials and signature INFINITI design cues: the double-arch grille, clamshell hood, crescent-cut D-pillar, 'human-eye' headlights and corresponding taillights

INFINITI's double-arch grille gives the 'face' of the QX50 a unique and distinguished appearance

The clamshell hood flows into the character lines running along the side of the vehicle, providing the QX50 with a distinctive visual signature

INFINITI's signature crescent-cut D-pillar extends the visual length of the roof line, and the rear pillar arcs forward, emphasizing motion even when the car is stationary

Rear LED taillights connect with the chrome tailgate strip, running along the side for an uninterrupted front-to-rear visual line
