

Celebrating a decade of the Nissan LEAF

10 billion miles driven | 2.5 billion kilograms of CO₂ emissions saved | 59 markets electrified

Nissan LEAF (1st gen)

Nissan LEAF e+

Nissan LEAF NISMO

Distance and CO₂ data based on Nissan Global Data Center calculation (as of October 2020).

Calculation: total distance driven (GDC data, based on approximately 50% of global LEAF volume) / number of Carwings-registered vehicles x total global sales number.
