

Nissan's Aluminium Closed-loop Recycling System

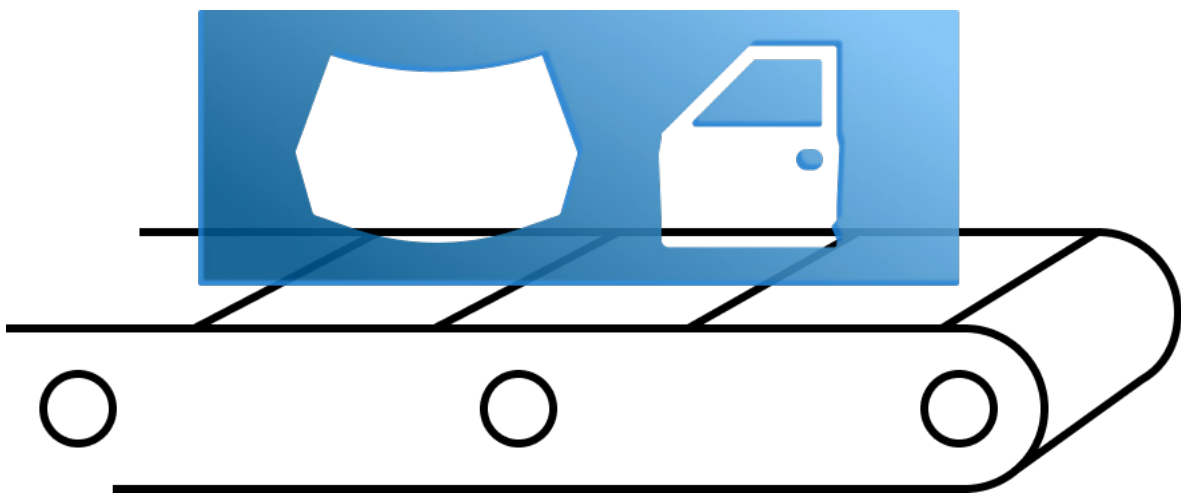

Nissan has introduced a “closed-loop” recycling system for the all-new Nissan Qashqai, reusing waste aluminium and reducing its footprint on mined resources.

	90%	Recycling aluminium saves more than 90 percent of the energy needed to make new aluminium.	
--	------------	--	--

→ Aluminium coils arrive at Nissan's Sunderland plant

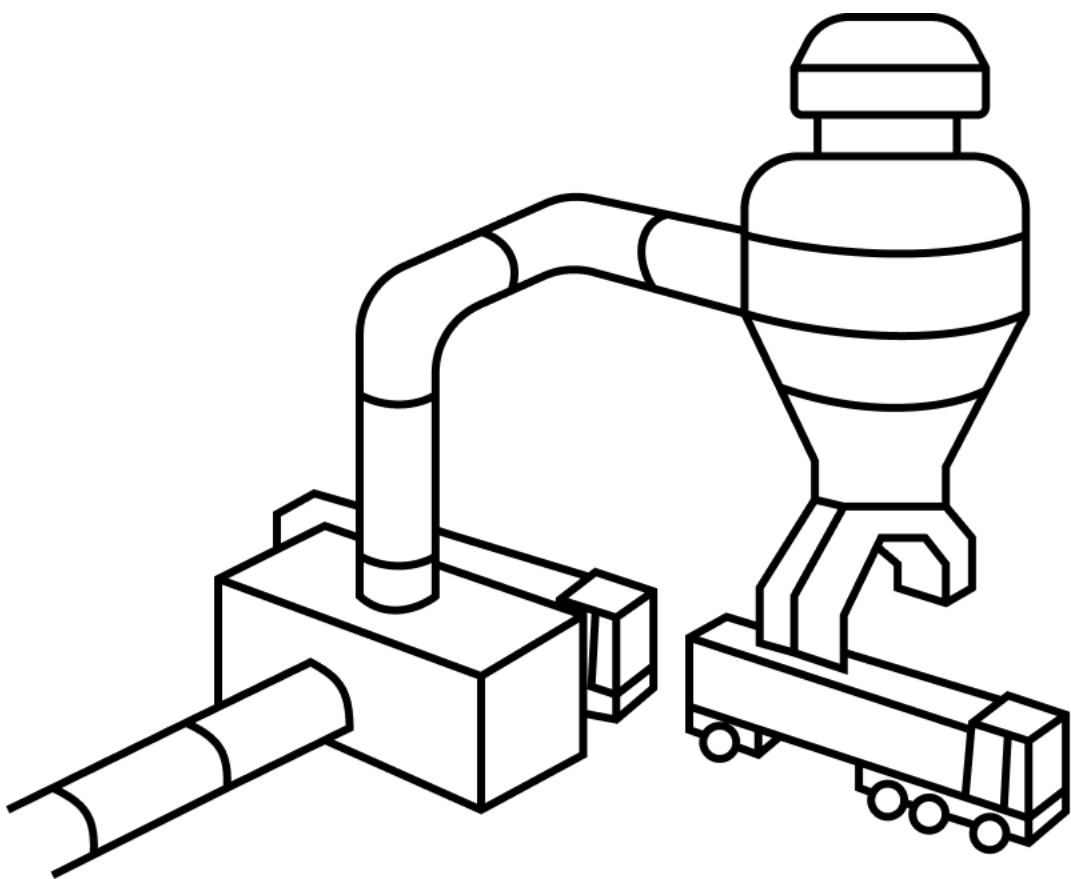

→ Parts of the all-new Qashqai are stamped from the aluminium

↑ New aluminium coils are produced from the recycled scrap

Scrap aluminium is processed through a cyclone

↑ Reprocessed scrap is delivered to the aluminium supplier for recycling
